

RADIO TRANSMITTERS

Kar-Tech Radio Controls include:

- 900MHz Frequency Hopping Spread Spectrum or 2.4GHz Direct Sequence Spread Spectrum.
- Full two way communications allows for ultimate reliability and rugged radio performance in high noise areas.
- Customizable to your application.
- On-board User Assist Diagnostics, both at transmitter and receiver, also using patented Palm Pilot interface.
- Controller Area Network (CAN) wire communications available as an option.

Elite Series:

- Rugged plastic ergonomic enclosure.
- Fully proportional Hall Effect joysticks or paddles.
- Available for proportional and on/off applications.
- 4 character LED or multiple character LCD display with backlight available for system information.
- Long lasting rechargeable NiMH batteries with fast-charger option.

Packer Series:

- Rugged plastic highly ergonomic enclosure.
- Fully proportional Hall Effect joysticks or paddles.
- Available for proportional and on/off applications.
- 4 character LED or multiple character LCD display with backlight available for system information.
- Long lasting rechargeable NiMH batteries with fast-charger option.

Impact Series:

- Available with joysticks, push buttons, switches, potentiometers and many other control options.
- Ergonomic and rugged enclosure.
- Available with a 24 character LCD display for instant machine feedback.
- Can be fully charged with the optional Smart Charger in 2 hours.

Guider Series:

- Rugged molded plastic "pendant" style enclosure with trigger guard.
- Fully proportional Hall Effect trigger.
- Available for proportional and on/off applications.
- Optional 4 character display for system information.
- Long lasting rechargeable NiMH batteries with fast-charger option.

Magnum Series:

- Rugged molded plastic belt-pack style enclosure.
- Available for any proportional or on/off applications.
- Optional 4 character display for system information.
- Long lasting rechargeable NiMH batteries with fast-charger option.
- Fully proportional Hall Effect joysticks or paddles.

RADIO TRANSMITTERS

Pilot Series:

- Rugged molded plastic ergonomic enclosure with trigger guard.
- Available for proportional and on/off applications.
- Fully proportional Hall Effect trigger.
- Optional 2x16 backlit LCD display.
- Long lasting rechargeable NiMH batteries with fast-charger option.

Mega Series:

- Ultra-rugged hand-held enclosure with textured grip boot.
- Easy to use, environmentally sealed single or dual-step pushbuttons with great tactile feedback.
- Available for any on/off applications.
- Operates on two AA batteries.

MK-Series:

- Ultra-rugged hand-held enclosure with oversized pushbuttons.
- Single or dual-step pushbuttons actuate easily with gloves on.
- Available for any on/off applications, especially overhead cranes.
- Operates on two AAA batteries.

Pocket Series:

- Rugged hand-held enclosure.
- Easy to use, environmentally sealed switches with great tactile feedback.
- Available for any on/off applications.
- Operates on any ordinary 9V battery.

Micro Series:

- Rugged hand-held ergonomically styled enclosure.
- Easy to use membrane switches with tactile feedback.
- Available for any on/off applications.
- Operates on a rechargeable Lithium Ion battery.
- Fits in hand comfortably.

Mini Series:

- Rugged plastic "Mini" style enclosure.
- Transmitter and receiver are small, convenient and easy to use.
- Transmitter includes membrane switches with tactile feedback.
- Available for any on/off applications.
- Operates on 2 ordinary AAA batteries.
